

Kronheden detecting permission report

Oct 8, 2026 · @Mark

Summary

The two parcels are former heath, ploughed only in the 20th century. They sit on the edge of a prehistoric burial-mound landscape and are crossed by old roads that ran to a ford in the Hegedal valley. They are worth searching. Expect a thin spread of road losses, Second World War material and the odd prehistoric piece rather than a settlement.

- **Start on the old road across 1bc.** The 1842-99 map shows a road running from the ford diagonally through the field. Hollow ways are recorded 46 m north and 54 m south of it.
- **WWII is on the parcel.** A German-era installation seen on 1954 air photos lies inside 1bc on its northern edge, and a burial mound 84 m south of the field was blown up by German forces in 1943. Treat anything that looks like ammunition as live.
- **Protected mounds are close but not on your ground.** Four protected mounds lie within 150 to 500 m, and three ploughed-out mounds lie 100 to 170 m north of 1bc. None falls inside the parcels as drawn today.
- **One record needs checking.** Protected mound 70031 was registered against matrikel 1ax in 1995, but its recorded position is about 180 m west of 1ax as the parcel stands today.
- **Two things to confirm:** whether the narrow strip west of 1bc, shown in lighter orange in your app, is part of the permission, and when 1bc was first ploughed.

Positions are worked from the register's coordinates and your screenshots, and are good to about 10 to 20 m.

The permission

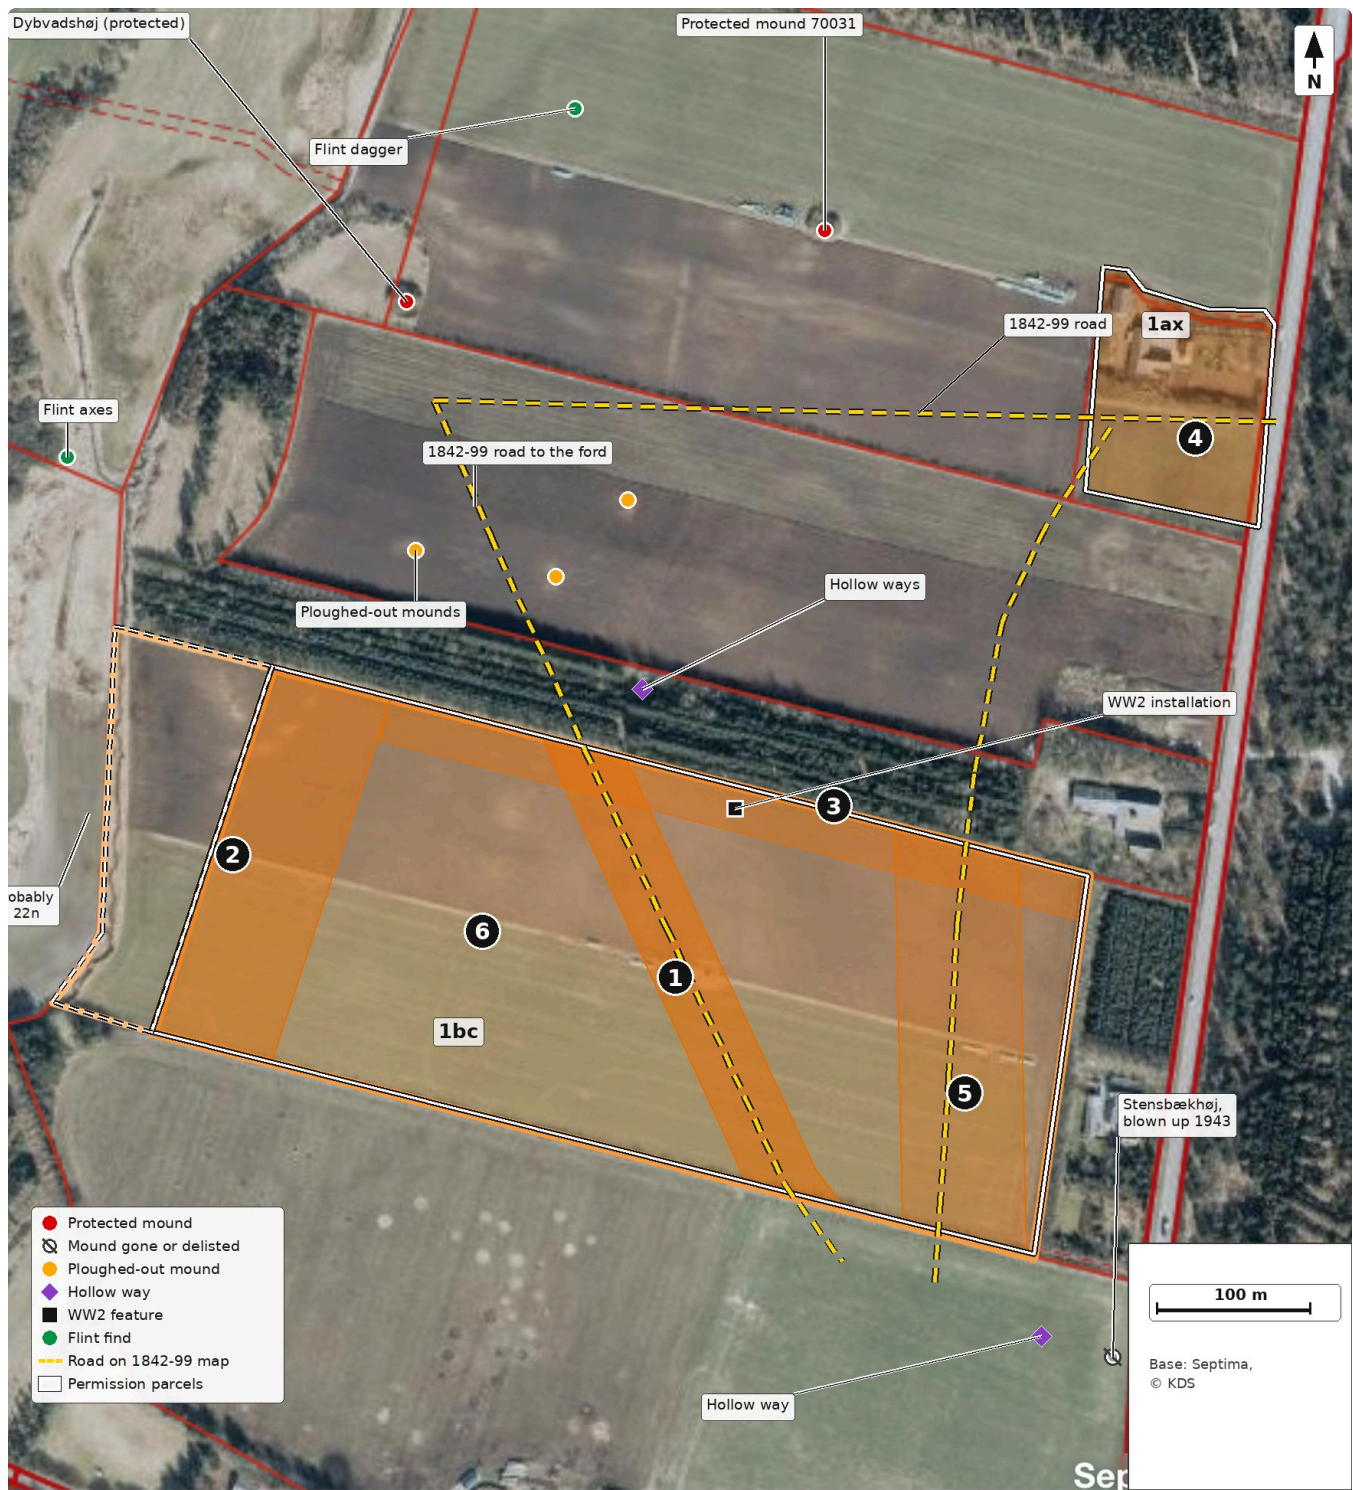

The permission is two parcels in ejerlav Kronheden, Lomborg, on the west side of Ringkøbingvej south of Lemvig. Together they come to about 15.6 ha.

Parcel	Address	Size	Shape and use
1bc	Ringkøbingvej 138, 7620 Lemvig	14.0 ha registered	Field about 550 to 590 m long and 255 m wide, south of a long tree belt; darker northern half and greener southern half
1ax	Ringkøbingvej 132, 7620 Lemvig	1.6 ha registered	Farmhouse of 1954 and yard in the north, small field or paddock in the south, fronting the main road
Strip west of 1bc (unconfirmed)	none	about 1.9 ha measured	Narrow strip on the valley edge, shown in lighter orange in the app; probably matrikel 22n

- **Parish and museum:** Lomborg-Rom parish, Lemvig Kommune. The responsible museum for these records is De Kulturhistoriske Museer i Holstebro Kommune.
- **Heights:** the ground rises from about 19 m at the west end of 1bc, by the Hegedal valley, to about 25 m at its east end. 1ax stands at about 27 m.
- **Land use:** both old maps show the whole area as open heath. The fields were broken from the heath after the 1901-71 survey.
- **Sizes** of 1bc and 1ax measured from my tracing of your app outlines come within 3% of the registered areas.

Map

The numbered areas run from the first place to search (1) to the last (6); the reasons are in Areas of interest below. White lines are the parcels; the dashed white line is the unconfirmed strip. Yellow dashed lines are roads and tracks on the 1842-99 map.

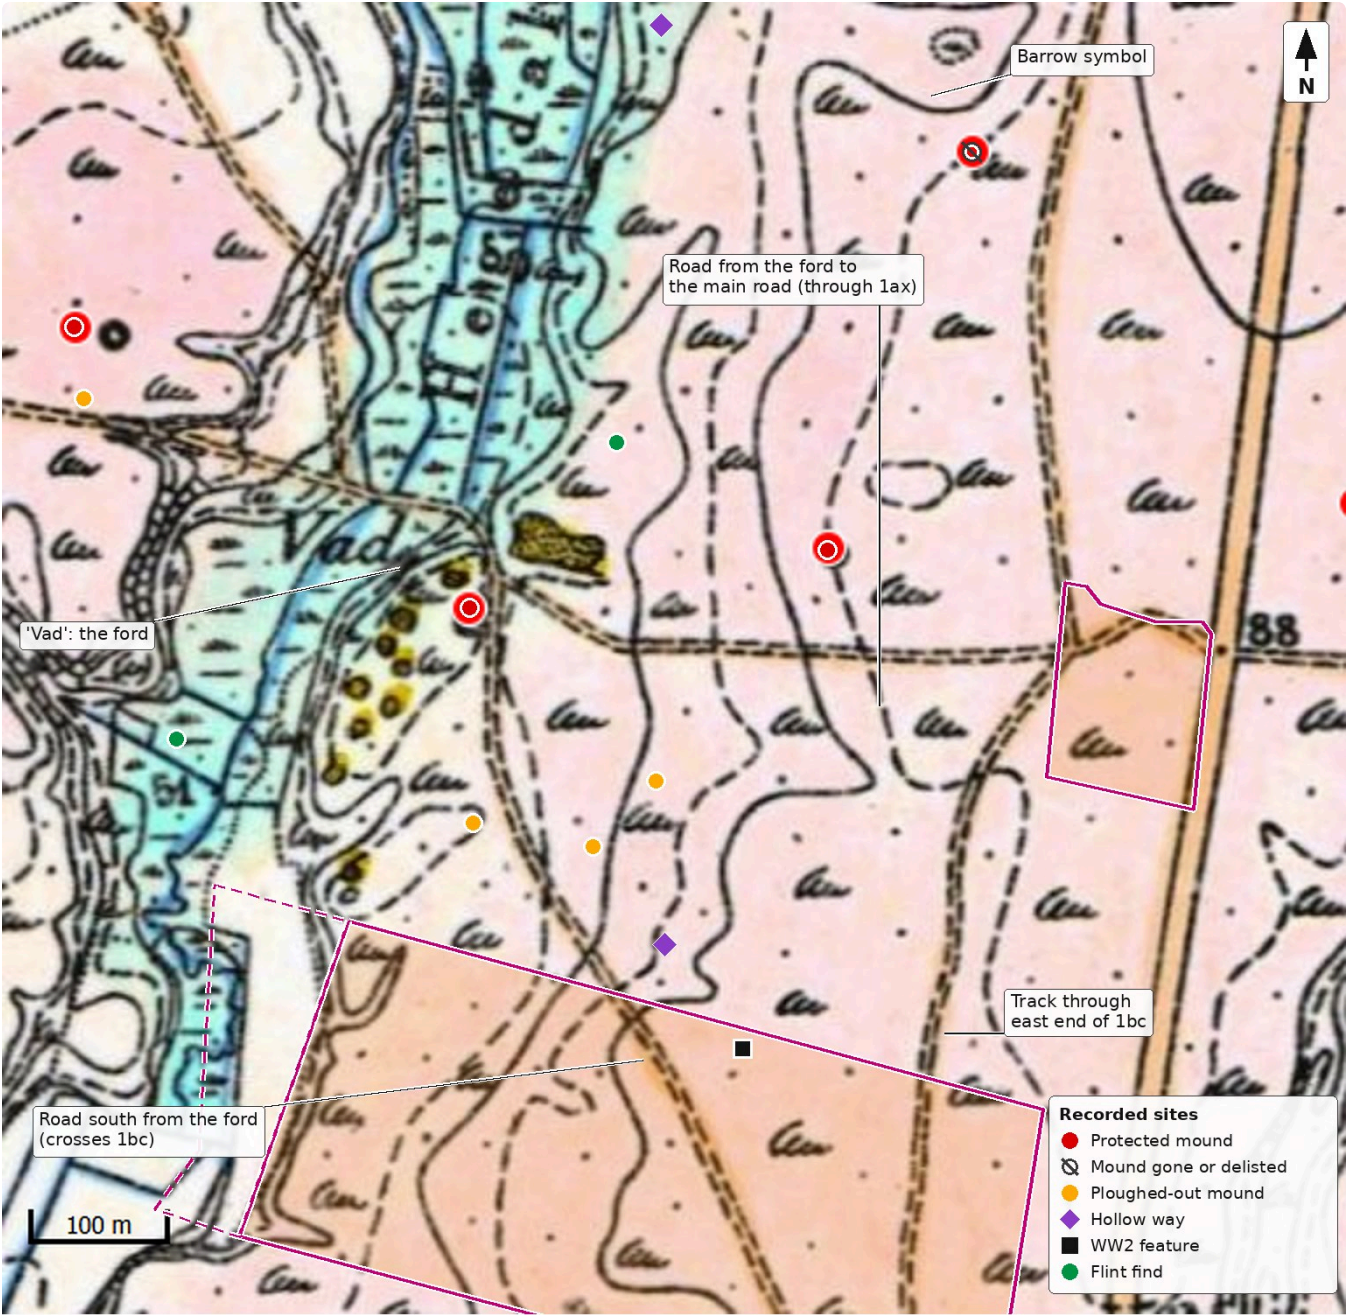

History of the area

For most of the last 5,000 years this was open heath: a place for burying the dead, grazing and passing through, not for living.

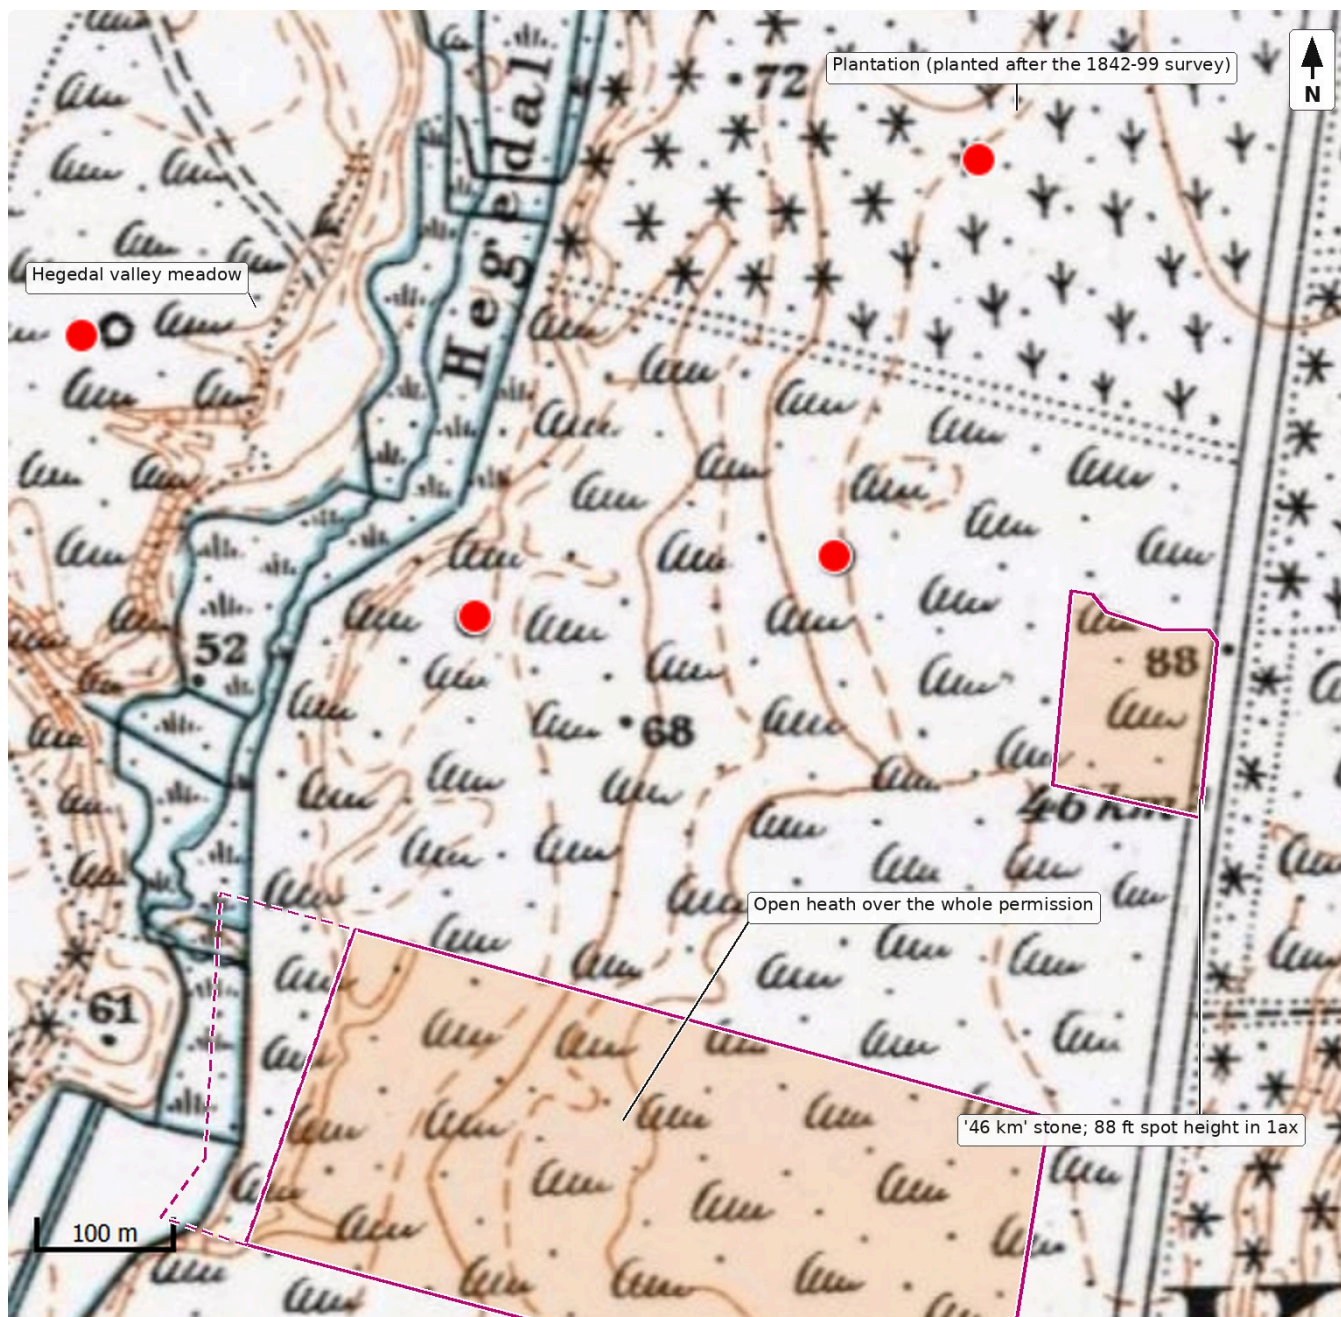

- **Burial mounds.** The heath west and north of the parcels holds a cemetery of round mounds, the usual West Jutland pattern for the late Stone Age and early Bronze Age. Four mounds are still protected. Six more have been ploughed flat and were spotted on air photos in 2012.
- **Stone Age finds.** Flint axes and a flint dagger have been found within 115 to 400 m of the parcels. The register dates them between about 3950 and 1700 BC, including a Single Grave culture axe of about 2800 to 2350 BC.
- **The ford.** The 1842-99 map marks 'Vad' (ford) in the Hegedal valley beside the protected mound Dybvadshøj, whose name means 'deep-ford mound'. In 1919 the National Museum noted numerous hollow ways running down to the ford.
- **Roads.** Ringkøbingvej was already the main road in the 1800s. Lesser roads from the ford ran east to it and south across the heath, two of them through or beside 1bc.
- **Plantation.** Kronhede was planted with conifers from about 1870, according to a walking guide to the forest. The plantation north-east of the parcels appears on the 1901-71 map but not the 1842-99 one.
- **The Second World War.** In 1943 German forces blew up the burial mound Stensbækhøj, 84 m south of 1bc, and its protection was cancelled in 1958. Air photos from 1954 show wartime installations inside 1bc and 300 m south of it, and trenches lie in the plantation east of the road.
- **Farming.** The heath was broken for fields during the 20th century. The farmhouse on 1ax dates from 1954 in the building register. The parish church, at Lomborg, is a Romanesque granite church of about 1235 to 1250.

What the old maps show

Both surveys show the parcels as open heath, crossed by tracks that converge on the ford. The 1842-99 sheet also carries the recorded sites.

Høje målebordsblade 1842-99: Kort © SDFI via Fund og Fortidsminder. Overlays placed to about 15 to 30 m.

Lave målebordsblade 1901-71: Kort © SDFI via Fund og Fortidsminder. Overlays placed to about 15 to 30 m.

- **Road south from the ford.** On the 1842-99 sheet a double-dashed road leaves the ford past Dybvadshøj and runs south-east across the heath. It enters 1bc about 210 m from the north-west corner and leaves the southern edge about 170 m from the south-east corner. The recorded hollow ways just north and south of 1bc lie on or close to its line.
- **Road from the ford to the main road.** A second road runs east from the ford and meets Ringkøbingvej at 1ax. On today's ground it passes through the 1ax farmyard.
- **Track through the east end of 1bc.** A lesser track branches south from that road at the west side of 1ax and runs through the east end of 1bc, 50 to 90 m in from its eastern edge.

- **Heath everywhere.** Both sheets show heather symbols over the whole permission. There are no buildings on either parcel and no field boundaries before the 20th century.
- **Plantation and stone.** The 1901-71 sheet adds the conifer plantation to the north-east and a '46 km' stone on the main road at the south-east corner of 1ax.
- **Heights.** The 1901-71 sheet gives spot heights in Danish feet: 88 ft (about 27.6 m) at 1ax, 68 ft (21 m) north of 1bc, and 52 to 61 ft (16 to 19 m) on the valley edge to the west.
- **Small pits.** The 1842-99 sheet shows a group of small brown circles just south-west of Dybvadshøj, by the ford. I read them as small diggings, probably for gravel or turf, but the symbol is not certain.

Recorded archaeology

Fund og Fortidsminder lists 24 sites within about 1 km. One lies inside 1bc, five more lie within about 100 m, and none of the protected mounds falls inside the parcels as drawn today.

Record	What it is	Date given	Distance
209831	WWII installation, seen on 1954 air photos	1940-45	Inside 1bc, northern edge
209421	Hollow ways, seen on air photos of 1954, 1965 and 1975	Undated	46 m north of 1bc
210212	Hollow way, seen on 2008 air photos	Undated	54 m south of 1bc
70037	Stensbækhøj: mound 1.7 m by 16 m, blown up by German forces in 1943; protection cancelled 1958	Prehistoric	84 m south of 1bc
209391	Ploughed-out mound, seen on air photos	3950-1101 BC	97 m north of 1bc
209392	Ploughed-out mound, seen on air photos	3950-1101 BC	104 m north of 1bc
70101	Single Grave culture flint axe, 19 cm, and the butt of a second axe	3950-2351 BC	115 m from the strip, 190 m from 1bc

Record	What it is	Date given	Distance
70021	Protected mound, 0.7 m by 9 m	Prehistoric	148 m east of 1ax, across the road
206434	Ploughed-out mound, seen on air photos	3950-1101 BC	165 m north of 1bc
70031	Protected mound, 2.2 m by 16 m; registered against matrikel 1ax in 1995; inspected 2008, 2016 and 2019	Prehistoric	183 m west of 1ax as drawn today
70030	Dybvadshøj: protected mound, 3 m by 22 m, by the ford	Prehistoric	255 m north of 1bc
209823	WWII installation, seen on 1954 and 1965 air photos	1940-45	337 m south of 1bc
232176 , 232177	WWII trenches, seen on the elevation model	1940-45	340 to 370 m east of 1ax
70164	Flint dagger, 16 cm	2350-1701 BC	360 m north of 1ax

Further out are the protected mound 70029, three more ploughed-out mounds, a mound whose protection was lifted in 1985 because it could no longer be found, two more hollow-way sites and three more flint-axe finds.

- **The mound cemetery** is the main prehistoric feature. Ploughed-out mounds 100 to 170 m north of 1bc show that burials once extended close to the parcel. Nothing recorded so far is on 1bc itself.
- **The hollow ways** are worn tracks of travellers and carts. They are undated, but the National Museum called them later than the mounds in 1919. They are the best guide to where people passed and dropped things.
- **The WWII features** show German activity across this heath in 1940-45. What the installation inside 1bc was is not recorded.
- **Mound 70031** is the one point to resolve. Its 1995 registration names matrikel 1ax, but the register places it about 180 m west of 1ax as the parcel is drawn today, on the field edge where a bush-covered hump shows on the air photo. Parcel boundaries have probably changed since. Ask the museum before detecting anywhere near it.
